

I am extremely concerned about the FCCs upcoming vote that would lead to more media consolidation. While I understand that cable and satellite access has provided us with more viewing capability, the fact is that the majority of the public will watch the news that is shown on their local channels. If those channels have been consolidated, they are more likely to get a single opinion rather than diverse views. I believe this is a threat to our democracy. Please consider your objectives and make sure that your decision serves public, rather than private, interest. On June 2nd, I urge you to retain the current ownership rules.
